SUBJECT INDEX

Acrylic
Characterization of fibres from acrylic polymers for cement composites: DSC study 135
Activation energy
Characterization of the catalytic oxidation of carbon black by TPD 19
Adiabatic
Structural and thermal properties in Gd–Y magnetic alloys 107
Ageing
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75
Albumin
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185
Alloy
Structural and thermal properties in Gd–Y magnetic alloys 107
Alumina
Variations in the chemisorption of methanol on α-Al_2O_3 in the range 200–300°C 59
Ammonium compound
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197
Annealing
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
Atmosphere
Applications of thermal analysis in the rubber industry 35
Short- and long-term degradation of polymer-based composites 97
Characterization of fibres from acrylic polymers for cement composites: DSC study 135
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197
The use of thermoanalytical techniques in the characterization of ancient mortars 215
ATP
Microbiological and calorimetric investigations on degraded marbles from the Cà d'Oro facade (Venice) 205
Bacteria
Microbiological and calorimetric investigations on degraded marbles from the Cà d'Oro facade (Venice) 205
Biphase
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
Blend
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75
A study on polymer–polymer interactions through mixing calorimetry 117
BSA
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185
Calorimetry
Structural and thermal properties in Gd–Y magnetic alloys 107
A study on polymer–polymer interactions through mixing calorimetry 117
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
Microbiological and calorimetric investigations on degraded marbles from the Cà d'Oro facade (Venice) 205
Carbon black
Characterization of the catalytic oxidation of carbon black by TPD 19
Catalyst
Characterization of the catalytic oxidation of carbon black by TPD 19
CCT
A new kinetic model for polymer crystallization derived by calorimetric analysis 83
Cement
Characterization of fibres from acrylic polymers for cement composites: DSC study 135
Ceramic
Thermal expansion behaviour of glass ceramics derived from prophyric sands 43

Chemisorption
Variations in the chemisorption of methanol on α-Al_2O_3 in the range 200–300°C 59
Complexation
The thermodynamics of lanthanide amino-polycarboxylate complexation 1
Composite
Short- and long-term degradation of polymer-based composites 97
Characterization of fibres from acrylic polymers for cement composites: DSC study 135
Concentration
Excess enthalpies of *N*-acetylglycineamide and *N*-acetyl-L-leucineamide in concentrated aqueous solutions of tetramethylurea 67
Co-ordination
The thermodynamics of lanthanide amino-polycarboxylate complexation 1
Thermal analysis of plasma-sprayed thermal barrier coatings 9
Copolymer
Room-temperature transitions and melting of tetrafluoroethylene–hexafluoropropylene copolymers with low comonomer contents 145
Cordierite
Durability of cordierite honeycomb structure for automotive emissions control 27
Crystallization
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75
A new kinetic model for polymer crystallization derived by calorimetric analysis 83
Non-isothermal kinetic equations applied to crystallization of glasses 125
A modulated DSC analysis of microbial biocompatible polyesters 157
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197

DDTA
Non-isothermal kinetic equations applied to crystallization of glasses 125
Decomposition
Short- and long-term degradation of polymer-based composites 97
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197
Deconvolution
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185
Degradation
Short- and long-term degradation of polymer-based composites 97
Desorption
Characterization of the catalytic oxidation of carbon black by TPD 19
DSC
Thermal analysis of plasma-sprayed thermal barrier coatings 9
Applications of thermal analysis in the rubber industry 35
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
A new kinetic model for polymer crystallization derived by calorimetric analysis 83
Characterization of fibres from acrylic polymers for cement composites: DSC study 135
Room-temperature transitions and melting of tetrafluoroethylene–hexafluoropropylene copolymers with low comonomer contents 145
A modulated DSC analysis of microbial biocompatible polyesters 157
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185
DTA
Non-isothermal kinetic equations applied to crystallization of glasses 125
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197
DTG
Applications of thermal analysis in the rubber industry 35
Durability
Durability of cordierite honeycomb structure for automotive emissions control 27

Elastomer
Applications of thermal analysis in the rubber industry 35
Equilibrium
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
Excess molar heat
Excess enthalpies of *N*-acetylglycineamide and *N*-acetyl-L-leucineamide in concentrated aqueous solutions of tetramethylurea 67

Fibre
Characterization of fibres from acrylic

polymers for cement composites: DSC study 135
Fungus
Microbiological and calorimetric investigations on degraded marbles from the Cà d'Oro facade (Venice) 205

Gadolinium
Structural and thermal properties in Gd–Y magnetic alloys 107
Gamma irradiation
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75
Glass
Thermal expansion behaviour of glass ceramics derived from prophyric sands 43
Non-isothermal kinetic equations applied to crystallization of glasses 125

Heat of crystallization
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75
Heat of dilution
Excess enthalpies of *N*-acetylglycineamide and *N*-acetyl-L-leucineamide in concentrated aqueous solutions of tetramethylurea 67
Heat of mixing
A study on polymer–polymer interactions through mixing calorimetry 117
Heat of solution
A study on polymer–polymer interactions through mixing calorimetry 117
Helix
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
HFP
Room-temperature transitions and melting of tetrafluoroethylene–hexafluoropropylene copolymers with low comonomer contents 145

Insulator
Thermal analysis of plasma-sprayed thermal barrier coatings 9
Isothermal
A new kinetic model for polymer crystallization derived by calorimetric analysis 83

Kinetics
Short- and long-term degradation of polymer-based composites 97
Non-isothermal kinetic equations applied to crystallization of glasses 125
Kissinger
Non-isothermal kinetic equations applied to crystallization of glasses 125

Lanthanon
Structural and thermal properties in Gd–Y magnetic alloys 107
Lanthanon compound
The thermodynamics of lanthanide amino-polycarboxylate complexation 1
Liquid crystal
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
LLDPE
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75

Magnetic
Structural and thermal properties in Gd–Y magnetic alloys 107
Marble
Microbiological and calorimetric investigations on degraded marbles from the Cà d'Oro facade (Venice) 205
MDSC
A modulated DSC analysis of microbial biocompatible polyesters 157
Melting
Room-temperature transitions and melting of tetrafluoroethylene–hexafluoropropylene copolymers with low comonomer contents 145
Methanol
Variations in the chemisorption of methanol on α-Al_2O_3 in the range 200–300°C 59
Microbe
A modulated DSC analysis of microbial biocompatible polyesters 157
Microbiological and calorimetric investigations on degraded marbles from the Cà d'Oro facade (Venice) 205
Microcalorimetry
Variations in the chemisorption of methanol on α-Al_2O_3 in the range 200–300°C 59
Model
A new kinetic model for polymer crystallization derived by calorimetric analysis 83
Short- and long-term degradation of polymer-based composites 97
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185

Mortar
The use of thermoanalytical techniques in the characterization of ancient mortars 215

NAGA
Excess enthalpies of *N*-acetylglycineamide and *N*-acetyl-L-leucineamide in concentrated aqueous solutions of tetramethylurea 67
NALA
Excess enthalpies of *N*-acetylglycineamide and *N*-acetyl-L-leucineamide in concentrated aqueous solutions of tetramethylurea 67
Non-isothermal
A new kinetic model for polymer crystallization derived by calorimetric analysis 83
Non-isothermal kinetic equations applied to crystallization of glasses 125

Oxide
Durability of cordierite honeycomb structure for automotive emissions control 27

PEEK
Short- and long-term degradation of polymer-based composites 97
Phase
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
PHB
A modulated DSC analysis of microbial biocompatible polyesters 157
Pollutant
Durability of cordierite honeycomb structure for automotive emissions control 27
Polyacrylate
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
Polyamide
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75
Polydispersity index
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
Polyester
A modulated DSC analysis of microbial biocompatible polyesters 157
Polymer
Molecular modifications and crystallization relationships for gamma-irradiated LLDPE/PA6 blends 75
A new kinetic model for polymer crystallization derived by calorimetric analysis 83
Short- and long-term degradation of polymer-based composites 97
A study on polymer–polymer interactions through mixing calorimetry 117
Characterization of fibres from acrylic polymers for cement composites: DSC study 135
A modulated DSC analysis of microbial biocompatible polyesters 157
Polymorphism
Thermal analysis of plasma-sprayed thermal barrier coatings 9
Polysaccharide
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
Program
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167

Random coil
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
Recycling
A modulated DSC analysis of microbial biocompatible polyesters 157
Ribonuclease
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185
RNAase
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185
Rubber
Applications of thermal analysis in the rubber industry 35

Side chain
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
Silicate
Durability of cordierite honeycomb structure for automotive emissions control 27
Smectic
Thermal and biphasic behaviour of a side-chain smectic polyacrylate 49
Solvent
Excess enthalpies of *N*-acetylglycineamide and *N*-acetyl-L-leucineamide in concentrated aqueous solutions of tetramethylurea 67
Spraying
Thermal analysis of plasma-sprayed thermal barrier coatings 9
Stoichiometry
Thermal analysis of plasma-sprayed thermal barrier coatings 9

TBC
Thermal analysis of plasma-sprayed thermal barrier coatings 9
TFE
Room-temperature transitions and melting of tetrafluoroethylene–hexafluoropropylene copolymers with low comonomer contents 145
TG
Applications of thermal analysis in the rubber industry 35
Short- and long-term degradation of polymer-based composites 97
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197
TGA
Thermal analysis of plasma-sprayed thermal barrier coatings 9
TG/DTA
The use of thermoanalytical techniques in the characterization of ancient mortars 215
TG–DTA
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197
Thermal barrier
Thermal analysis of plasma-sprayed thermal barrier coatings 9
Thermal expansion
Thermal expansion behaviour of glass ceramics derived from prophyric sands 43
Thermodynamics
The thermodynamics of lanthanide amino-polycarboxylate complexation 1
The deconvolution of multi-state transition DSC curves of biological macromolecules: bovine serum albumin and bovine seminal ribonuclease 185
TPD
Characterization of the catalytic oxidation of carbon black by TPD 19
Transition
Thermal expansion behaviour of glass ceramics derived from prophyric sands 43
Room-temperature transitions and melting of tetrafluoroethylene–hexafluoropropylene copolymers with low comonomer contents 145
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
TTT
A new kinetic model for polymer crystallization derived by calorimetric analysis 83

Vanadium compound
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197

Xanthan
A calorimetric study of cooperative phase equilibria in microbial polysaccharides 167
XRD
Thermal analysis of plasma-sprayed thermal barrier coatings 9
Thermal behaviour of $(NH_4)_2V_6O_{16}$ prepared by hydrothermal crystallization 197
The use of thermoanalytical techniques in the characterization of ancient mortars 215

Yttrium
Structural and thermal properties in Gd–Y magnetic alloys 107
